WELCOME MESSAGE

Dear Colleagues and friends,

The International Conference on Accelerator and Large Experimental Physics Control Systems (ICALEPCS) gathers the experts in control and data acquisition systems from the scientific installations all over the world. Thirty years after the first in the series organized by CERN, it represents a growing community from different domains, such as all kinds of particle accelerators, Colliders, Synchrotron Light Sources, Neutron Sources, Free Electron Lasers, Laser Facilities, Tokamaks, Telescopes, and a large number of smaller laboratories. It takes place every two years, and is organized in a location alternating between three major areas of the world: America (including North, Central and South America), Asia (including Oceania) and Europe (including Russia, the Near East and Africa).

ICALEPCS2017 is organized by the Synchrotron Alba, and will take place at the Palau de Congressos of Barcelona, Catalunya, Spain, on October 8 – 13, 2017.

On behalf of the Organizing Committee, I would like to get you on board as a sponsor in this event, where over 600 participants from all over the world are expected, including large and small facilities, universities and laboratories, representatives from installations in construction and future projects.

ICALEPCS offers a singular opportunity for vendors and sponsors who offer technologies, instrumentation, software, consultancy and services in control and data acquisition systems.

More information about the conference can be found at www.icalepcs2017.org
We look forward to meeting you in Barcelona!

Yours sincerely,

David Fernández
Conference Chair

ABOUT ICALEPCS

PRESENTATION

ICALEPCS facilitates fruitful collaborations among the world's control system specialists from large scientific installations, such as particle accelerators, light sources, laser facilities, telescopes, tokamaks, etc. The series of ICALEPCS conferences started in 1987 in Villars-sur-Ollon (Switzerland), hosted by CERN. The conferences subsequently rotated between three major areas of the world: America (including North, Central and South America), Asia (including Oceania) and Europe (including Russia, the Near East and Africa). Over the years the conferences saw a growing number of participants, Institutes and countries.

ICALEPCS is a biennial series of conferences that is intended to:

- Provide a forum for the interchange of ideas and information between control system specialists working on large experimental physics facilities around the world (accelerators, particle detectors, fusion reactors, telescopes, etc.);
- Create an archival literature of developments and progress in this rapidly changing discipline;
- Promote, where practical, standardization in both hardware and software;
- Promote collaboration between laboratories, institutes and industry.

The conference consists of scientific program including keynote, invited and contributed talks and poster sessions covering the following areas:

- Experiment Control
- Functional Safety and Machine Protection
- Software Technology Evolution
- User Interfaces and User Experience (UX)
- Project Status Reports
- Control System Upgrades
- Data Management and Processing
- Integrating Diverse Systems
- IT Infrastructure for Control Systems
- Feedback Control and Process Tuning
- Hardware Technology
- Timing and Synchronization
- Systems Engineering, Collaborations and Project Management
- Data Analytics

The International Advisory committee (ISAC) is chaired by Andy Götz (ESRF, The European Synchrotron, France) and counts 40 members distributed as follows: 17 from Europe/Africa, 12 from Americas and 11 Asia/Oceania.

The committee met once on May 30 and 31 2016 to establish the themes and will meet again during the conference in October 2017. The program committee will be appointed during the following weeks and will meet about 5 months before the conference to finalize the scientific program.
